PROFESSIONAL SUMMARY

Recent Computer Engineering graduate with hands-on experience in system administration, networking, and technical troubleshooting. Skilled in Linux, Windows, Python, and hardware diagnostics, with experience managing servers, configuring networks, and resolving technical issues. Strong analytical and problem-solving abilities with a focus on reliability, performance, and continuous learning.

TECHNICAL PROJECTS

Home Infrastructure & Server Administration

- Configured and maintained home network infrastructure including DHCP reservations, port forwarding, and remote connectivity
- Deployed and managed Linux and Raspberry Pi-based services, game servers, and media hosting environments
- Diagnosed hardware, software, and network issues to improve system reliability and uptime
- Migrated media server infrastructure from Plex to Jellyfin while maintaining functionality and accessibility

Custom PC Building & Hardware Troubleshooting

- Built and configured multiple custom desktop systems focused on performance, stability, and reliability
- Diagnosed and resolved hardware and software failures including boot, thermal, and driver-related issues
- Installed and configured operating systems, drivers, peripherals, and system utilities

3D Printing & Technical Workflow Optimization

- Operated and maintained 3D printing equipment while troubleshooting hardware and software issues
- Optimized print workflows and slicing configurations to improve efficiency and output consistency

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL (Basic)

Systems: Linux, Windows

Networking: DHCP, Port Forwarding, Remote Access, Network Configuration

Tools: Git, Visual Studio, Microsoft Office, Blender

Concepts: Troubleshooting, System Administration, Hardware Diagnostics, Scripting

EDUCATION

Bachelor of Science in Computer Engineering

Wright State University — Dayton, OH | 2023

- 3.811 GPA

Associate of Science in Engineering

Sinclair Community College — Dayton, OH | 2021

Relevant Coursework

- Cyber Network Security
- Host Computer Security
- Linux Operating Systems
- Networking Fundamentals

EXPERIENCE

Owner & Operator — G217Games

2017 — Present

- Managed e-commerce operations including inventory tracking, pricing, shipping, and customer support
- Analyzed sales and inventory data to improve purchasing decisions and operational efficiency
- Maintained accurate transaction records and resolved customer issues in a timely manner
